

**Exhaust Hose:
Type SSS**

Design: Round, double interlocked special profile

Material:

- Stainless Steel Strip 1.4301 (AISI 304), 1.4828, 1.4539
- Other materials on request

Characteristics:

- Excellent durability
- High tensile and bending strength
- High resistance against pressure, impact and mechanical stress
- Excellent absorption of axial, lateral and angular vibrations
- Compensation of mounting tolerances
- Special winding technique ensures almost complete gastightness with highest flexibility

Applications:

- Used as decoupling element in On- and Off-Road vehicles.

Delivery:

- According to customers' requirements.
