Introducing Pressure Hose

XPH

**Unrivaled
flexibility**

**Outstanding
durability**

**Lean
processes**

**Easy
installation**

The ultimate solution for every industry!

The Pressure Hose XPH is engineered for excellence, delivering unparalleled flexibility across various sectors. Its dynamic design adapts effortlessly to a wide range of applications, ensuring it meets your unique needs.

Built to last, our Pressure Hose XPH boasts exceptional durability, thriving even in the toughest environments. Crafted from high-quality stainless steel, it offers outstanding corrosion resistance and reliability.

Backed by rigorous in-house validation tests, Pressure Hose XPH proves its superior performance under defined load conditions.

Discover the new Pressure Hose XPH:

Custom solutions for every need!

Diameter Range: from DN 50 to DN 150

Length: length-flexible manufacturing with zero extra tooling costs

Our new Pressure Hose XPH can be tailored with a variety of components, including piping, flanges, and adaptors in different materials. This ensures a perfect fit, even in the tightest spaces.

Experience seamless installation with Pressure Hose XPH!

✓ **Reduced Stress**

High flexibility minimizes vibrations, preventing leaks, breakdowns, and performance loss of adjacent parts.

✓ **High Adaptability**

Enjoy easy installation with outstanding flexibility.

✓ **Vibration Damping**

The outer braiding effectively dampens eigenfrequencies.

✓ **Streamlined Process**

Save time and effort while ensuring compatibility with existing setups.

✓ **Efficiency Boost**

High performance means less maintenance and increased efficiency. Transform your installations with Pressure Hose XPH – reliable, efficient and built to last!

✓ **Diverse Profiles**

Pressure Hose XPH geometries offer unique characteristics for various requirements.

✓ **Chemical Resistance**

Well suited for aggressive media.

✓ **Corrosion Resistance**

Crafted from stainless steel for enhanced durability.
